Helix S 6B
Helix S 6X
Helix IK S10 SVC
* optional Helix Conductor available

B&O Unleashed was supposed to be the icing on the cake of Ford's #1 seller. The immersive experience was what owners craved from their audio systems, but the performance was a miss. That's why we've enhanced not only the tonality, volume and fun, but pushed the immersive aspects to another level at the same time, creating a sound experience like no other! As with all Systems by MSC solutions, each package includes everything required to outfit the system, including wiring, connectors, powdercoated aluminum amplifier and speaker mounts, threaded inserts and the sound setup to bring it all together.
